Introduction

Community Action Agencies throughout the country are required to conduct a community needs assessment every three years. This needs assessment relies on relevant and current research literature, data from client surveys and community partner surveys, as well as data from the U.S. Census Bureau and Bureau of Labor Statistics. This community needs assessment is intended to guide Area IV Agency on Aging and Community Action (Area IV) in developing its strategic plan to improve the economic security and well-being of low-income Hoosiers in its service area.

About Area IV Agency on Aging and Community Action

Since 1966, Area IV has been helping people and changing lives in Indiana. Area IV is an independent, non-profit organization that provides valuable services and assistance to individuals and families, most of whom are low-income. Area IV nurtures self-sufficiency by providing health, housing, and education services that change lives, empower families, and improve the communities that they serve.

Service Area & Programs

Area IV Community Action Agency's Community Service Block Grant (CSBG) service area is Carroll, Clinton, Tippecanoe, and White counties.

Their extended service area includes Benton, Boone, Fountain, Hamilton, Hendricks, and Montgomery counties.

Programs offered include:

- Area Agency on Aging
- Childcare Center (able to accept vouchers)
- Community Needs Assessment
- Energy Assistance Programs
- Weatherization Programs
- Congregate Meals
- Home-Delivered Meals (Senior Meals and Nutrition)
- Senior Farmer's Market Nutrition Program

Direct Service Area Statistics

In 2023, Area IV served 19,761 households, which included 27,345 individuals.

Seniors

- 814 care management assessments and in-home services were completed
- 2,807 unplanned transitions were conducted
- 81% of individuals age 65+ maintained independent living

Early Childhood

- 100% of children demonstrated school readiness
- 100% of children demonstrated improved emergent literacy skills

Households

- 78% of individuals experienced improved health and safety due to improvements within their home
- 100% of targeted participants increased their savings

Overview of the Causes and Conditions of Poverty

Poverty has existed in every society, and scholars, government leaders, and social service providers offer a wide variety of thoughts about how best to tackle this multi-faceted epidemic. By better understanding poverty, how it is measured, and the causes and conditions of it, Community Action Agencies and their partners will be better equipped to develop interventions that are responsive to community conditions. We strive to make our communities places in which all Hoosiers can meet their basic needs and achieve financial well-being, enabling each person to reach their full potential and better contribute to their families, communities, and the world.

What is Poverty?

Both domestically and globally, scholars, nonprofits, politicians, and countless others have made different, and sometimes opposing efforts to end poverty. In 1964, President Lyndon Johnson declared war on poverty in his State of the Union address, proclaiming, *“Our aim is not only to relieve the symptom of poverty, but to cure it and, above all, to prevent it.”* He launched a movement that resulted in the development of Community Action Agencies, which still carry forward the mission of ending poverty and promoting community development today. Community Action Agencies fight poverty by providing direct services for education, employment and family-centered support to low-income families. Sargent Shriver, who led the development of solutions, described the War on Poverty as *“a means of making life available for any and all pursuers. The War on Poverty tries only to create the conditions by which the good life can be lived.”*

“Poverty is hunger. Poverty is lack of shelter. Poverty is being sick and not being able to see a doctor. Poverty is not having access to school and not knowing how to read. Poverty is not having a job, is fear for the future, living one day at a time. Poverty has many faces, changing from place to place and across time, and has been described in many ways. Most often, poverty is a situation people want to escape.”

-The World Bank

How is Poverty Measured?

In the United States, poverty is measured by comparing a person’s or family’s income to a poverty threshold. This threshold is set at three times the cost of a minimum food diet in 1963, adjusted for inflation, and is responsive to family size. The U.S. Census Bureau is the government agency in charge of measuring poverty. As *Overlooked and Undercounted: Struggling to Make Ends Meet in Indiana* shows, this method of measuring poverty fails to count many who struggle.ⁱ When a county- and family-specific basic needs budget is compared to family incomes in Indiana, the scope of income inadequacy in our state comes into sharper focus and includes many more individuals than are captured in traditional poverty measures.

Understanding the Causes and Conditions of Poverty

While poverty is most simply a shortage of income, teasing apart the causes and associated conditions of these income shortfalls can be much more challenging and will vary based on local, state, and national policy choices as well as variations in communities, institutions, and individuals. Understanding the causes and conditions can assist in the development of effective solutions. Theories about the causes of poverty fall into three broad categories: political, structural, and behavioral.ⁱⁱ These focus attention on different sets of actors and interventions to address poverty. Community Action Agencies tend to work across all categories. Whether explicit or implicit, an individual's or organization's theories about the causes of poverty can shape decision-making about approaches.

Because employment is so central to a household's ability to make ends meet in the United States, job loss, a decline in earnings, a lack of education, a disability, and the presence of children and/or caregiving responsibilities can cause poverty.ⁱⁱⁱ Lack of access to foundational resources such as transportation, child care, health care, and decent, affordable housing, as well as interaction with the justice system, can also cause poverty.^{iv} This can trap children and families in a cycle that is difficult to escape.^v

There are disparities in the prevalence of poverty by race, gender, ability, age, and other identities. Historic and ongoing discrimination at all levels of society - from policies that prevented Black families from accruing wealth through homeownership to discrimination in employment^{vi} to differing expectations about who should provide care to young children^{vii} - contribute to these disparities. In turn, poverty can lead to low education levels, lack of or under-employment, poor housing conditions, food insecurity, mental and physical health challenges, and an inability to access additional resources to live a happy and healthy life that show up disproportionately for certain groups.

The COVID-19 pandemic exacerbated issues intersecting with poverty such as housing, education, food, reliable income, and perhaps most importantly our most precious asset, our children. It increased housing and food insecurity, reduced familial income, impacted children's school performance and mental health, and increased rates of abuse and child maltreatment. School closures contributed to many of these factors as students were unable to access meals provided at school, social support systems, and a safe environment away from abusers. Brown University projected, based on learning patterns of five million students, that school-aged children in the United States learned less than 50% of math skills and less than 70% of language art skills than they would have acquired with in-person learning the previous spring.^{viii} The Organization for Economic Cooperation and Development has estimated that school closures will result in approximately a 3% lower income for children affected by the closures over their entire lifetime, but it will be even more deeply felt by vulnerable children who will have larger learning losses, and therefore deeper losses in lifetime earnings.^{ix} Remaining mindful of the new landscape and challenges COVID-19 created will be necessary in efforts to address poverty.

Finally, poverty leads to associated conditions that can compound the challenges of providing support to help individuals reach and maintain self-sufficiency. These include hunger, limited access to education and other services, discrimination, exclusion, and lack of opportunities for civic participation.^x Physiological effects such as toxic stress and poor physical health can create additional barriers. Evidence suggests that these can be particularly damaging for young children, as they impact brain development and cognitive function.^{xi} Addressing these conditions – as well as the root causes of poverty – are critical to achieving widespread well-being.

Community Action Agencies can:

- Engage staff in reflection on assumptions about the causes and conditions of poverty
- Ensure that all individuals receive fair and equitable treatment through ongoing internal and external evaluation
- Be responsive to disparities in poverty through programming selection
- Collect data on the causes and conditions of poverty in their service area

Methodology

Client Surveys

Between September and December 2023, the Indiana Community Action Poverty Institute created and conducted both a client and community partner survey using SurveyMonkey for Area IV. The client survey consisted of 76 questions that were reviewed by Area IV staff and revised according to their needs. A link to the survey was sent to clients of Area IV in November and December of 2023 by email, and the survey was active for eight weeks. The survey consisted of multiple choice and open-ended questions. Five hundred fourteen individuals completed the survey over this time. Survey participants were from Tippecanoe (25.1%), Montgomery (15.4%), Hamilton (13.4%), Fountain (11.7%), Hendricks (8.6%), Benton (6.4%), Clinton (6.0%), White (4.5%), Warren (3.3%), Boone (2.9%), and Carroll (2.7%) counties.

During the data analysis process, incomplete surveys were included in the findings to honor the time spent by all participants in their attempt to complete the survey. Survey responses were filtered by the counties that the agency serves through Community Action. Due to respondents not having to answer all the questions, some tables will not include all participants. The survey team utilized SurveyMonkey analysis software to analyze multiple choice survey questions. Open-ended survey questions were exported to NVivo for further analysis.

Secondary Data

While a primary focus of the community needs assessment is elevating the voices and expressed needs of low-income Hoosiers, secondary data drawn from the U.S. Census Bureau's American Community Survey and other sources provide valuable supplemental information about the service area throughout the report. The American Community Survey is conducted yearly and sent to a sample of approximately 3.5 million addresses in the 50 states, District of Columbia, and Puerto Rico. It asks about a range of topics, including education, employment, internet access, and transportation and typically achieves a high response rate (84.4% in 2022). Local, state, and national leaders depend on the American Community Survey to understand local issues, develop programs, and distribute funding. These secondary data are intended to help speak to the scope of needs facing local communities and thereby assist in strategic planning.

Service Area Demographics & Poverty Statistics

Demographic data offer a snapshot of who lives in particular communities at a given time and can provide a basis for understanding the needs of a community. For example, communities with a large proportion of older Hoosiers may require more services related to aging while those whose communities vary greatly on ethnicity and primary language data may require more translation and interpretation services.

Population for Whom Poverty Status is Determined¹

	CSBG Service Area	Carroll	Clinton	Tippecanoe	White
POPULATION					
Total	247,256	20,169	32,131	170,698	24,258
AGE					
Under 5 years	14,840	1,076	2,217	10,175	1,372
5 to 17 years	40,652	3,279	6,295	26,890	4,188
18 to 34 years	72,520	3,908	6,629	57,413	4,570
35 to 64 years	84,187	7,843	11,936	55,127	9,281
65 years and over	35,057	4,063	5,054	21,093	4,847

Two or more races	11,776	461	2,131	8,425	759
Hispanic or Latino origin (of any race)	24,406	959	5,602	15,645	2,200

Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

¹ The population for whom poverty status is determined excludes individuals living in Institutional group quarters (such as prisons or nursing homes), college dormitories, military barracks, living situations without conventional housing (and who are not in shelters), and unrelated individuals under age 15 (such as foster children).

Poverty Rates

In Area IV’s CSBG service area, approximately 39,142 Hoosiers experience poverty (15.8%). Poverty was highest in Tippecanoe County (19.1%) and lowest in Carroll (7.3%) county. Hoosiers in poverty in the service area are more likely to be female, age 18 to 34, and White.² At the same time, a higher proportion of children under 5 (17.6%), children age 5-17 (13.3%), Black (34.0%), American Indian / Alaska Native (26.0%), Asian (32.2%), Other Race (14.9%), Two or More Races (21.3%), and Hispanic/Latino (16.2%) Hoosiers in the service area experienced poverty.

Poverty Rates by County

Carroll	Clinton	Tippecanoe	White
7.3%	9.0%	19.1%	8.7%

Service Area Poverty Rates

	Number in Poverty	% in Poverty	State % in Poverty
Total Population	39,142	15.8%	12.3%
Male	18,783	15.7%	11.1%
Female	19,359	16.0%	13.5%
Under 5	2,611	17.6%	18.4%
5 to 17	5,396	13.3%	15.3%
18 to 34	21,400	29.5%	15.8%
35 to 64	7,401	8.8%	9.7%
65+	2,334	6.7%	8.1%
White	27,696	13.6%	10.1%
Black	3,676	34.0%	25.1%
American Indian / Alaska Native	67	26.0%	17.2%
Asian	3,755	32.2%	14.8%
Native Hawaiian / Pacific Islander	*	*	14.2%
Other	1,434	14.9%	19.9%
Two or More Races	2,507	21.3%	17.3%
Hispanic / Latino ³	3,944	16.2%	18.3%

Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

² At the county level, particularly when disaggregating by gender, race, or age, sample sizes tend to be smaller and therefore results have a wider margin of error. Use caution in interpreting results.

³ In addition to questions about race/ethnicity, the Census Bureau asks individuals if they identify as Hispanic/Latino or not Hispanic/Latino.

Community Satisfaction and Needs

Local governments, community programs, and advocates are constantly working to understand the needs of their residents. This is particularly important in light of the disruptions caused by the COVID-19 pandemic. Knowing what needs are most important to residents can ensure that community members are able to live happy, healthy, and productive lives. Our primary method of establishing needs was through direct consultation with low-income Hoosiers in the service area. We used a client survey to identify the top five needs in their community using a pre-established list of 19 common needs. They were then asked to write what their top choice was and why along with a blank entry. The blank entry allowed us to capture needs not represented in the list and to represent Hoosiers' needs in their own words. For each identified need, a selection of the respondents' own words are used to explain the perceived need, while research studies and secondary data provide additional perspective on the need's relationship to poverty.

Client Survey Participants

Among the 514 survey respondents:

- Individuals represented a wide range of ages including adults 18-24 (7.0%), 25-34 (19.7%), 35-49 (23.1%), 50-64 (23.2%), 65+ (27.0%).
- 84.2% were female, 14.4% were male, and 1.2% preferred not to say.
- 80.7% of survey participants identified as White, 11.5% as Black, 3.3% as two or more races, 3.3% preferred not to say, and less than 1% identified as other or American Indian.
- 5.0% identified as Hispanic or Latino/a.
- 47.0% of survey participants stated that there were children who live in their household at least part-time, and of those, 13.1% of individuals with children indicated that the children in their household are their grandchildren.
- 69.5% indicated they were single, 23.6% that they were married, 5.0% lived with a partner, and 2.0% lived with a roommate.
- Of the 326 participants who agreed to answer questions about food security, 90 (27.7%) reported that someone in their household had cut the size of their meal or went hungry at least one to two days each week and 29 (8.9%) said they experienced this 3 or more days each week.
- 176 survey participants reported that they or a member of their family had a disability, 140 receive SSI, SSDI, or VA benefits, 7 have applied for benefits and are waiting to hear back, and 20 applied for benefits and had been denied.

Community Satisfaction

Participants who indicated that they recently received services from Area IV were asked five agency-specific questions to assess customer satisfaction of the agency. Satisfaction was assessed by having clients rank how satisfied they were with the services, time it took, staff knowledge and treatment, and overall satisfaction of the agency. The results are provided below.

Client Satisfaction

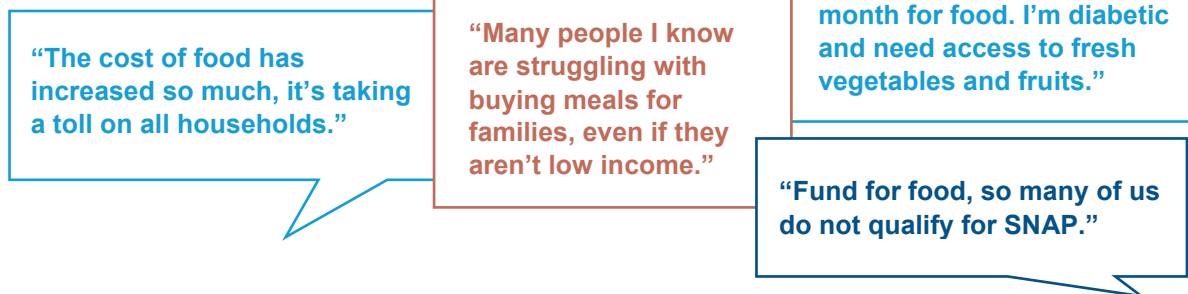

Top Community Needs

The following top five needs were identified based on client and community partners' responses, and are compared to the needs identified in Area IV's 2021 needs assessment. They are listed in order from greatest to least. The clients' top five identified needs are discussed in depth below.

Comparison of the Top 5 Needs Identified on Current and Previous Surveys		
	2024 Client Survey	2021 CNA
1	Food assistance	Good jobs with adequate wages, benefits and opportunities
2	Quality and affordable housing	Programs for youth
3	Transportation support	Weatherization
4	Services for those with physical and mental disabilities	Legal services
5	Good jobs with adequate wages, benefits and opportunities	Addiction Services

Food Assistance

In clients' own words:

One of the most common conditions in the lives of those experiencing poverty is suffering from food insecurity and undernourishment. Food insecurity occurs when people do not have adequate access to sufficient and nutritious food, which can lead to malnutrition.^{xii} The cycle of malnutrition, food insecurity, and poverty fuel each other. Economic stability is affected when individuals’ undernourishment harms their physical and mental development, intellectual capacity, productivity, and economic potential. The intergenerational cycle of poverty and malnutrition is evident as malnourished women are at a higher risk of giving birth to malnourished children or having their children grow up to be malnourished. When poverty is experienced in early childhood, the likelihood of malnutrition increases and can cause impaired cognitive development and mental illness as an adult. Therefore, intervention to support the nutrition needs of children are especially important.^{xiii}

Interventions targeting nutrition can be specific to an individual’s needs, but community engagement and delivery strategies can be equally beneficial if they reach those in the greatest need and incorporate disease and infection prevention.^{xiv} Ensuring that individuals in poverty access programs, like the Supplemental Nutrition Assistance Program (SNAP), can also promote access.

Communities that lack access to nutritious food and those who serve them will find great success at combating poverty when food access is addressed.

SNAP Participation Rates

	% of Households below poverty not receiving SNAP
Carroll	6.6%
Clinton	6.1%
Tippecanoe	16.8%
White	7.9%

Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

Community Action Agencies can:

- Continue referrals to and/or offer direct food assistance, such as through pantries or boxes
- Offer mobile pantry and box food services
- Connect clients with programs like SNAP and WIC

Quality and Affordable Housing

In clients' own words:

Poor housing quality and lack of stable housing can be both a cause and condition of poverty. Researchers find that low-cost, decent quality housing in areas with job opportunities can make a significant difference in addressing poverty.^{xv} Conversely, poor-quality housing can lead to poor health outcomes, increasing poverty as individuals struggle to access healthcare.^{xvi} Weatherization is a strategy for addressing housing quality that also contributes to reduced utility costs, improving a household's financial position.^{xvii}

Survey participants who lived in their home for at least one year reported an average rent increase of \$144 in the past 12 months. The U.S. Census Bureau asks Hoosiers about housing quality and affordability as part of the American Community Survey. The table below shows the estimated number of housing units in the CSBG service area and the percent that have one or more of following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner's costs as a percentage of household income greater than 30 percent, and 5) gross rent as a percentage of household income greater than 30 percent.

Units with Poor Housing Affordability/Quality Conditions in CSBG Service Area

Owner-Occupied Units:	61,886
% Owner-Occupied Units with One or More Condition:	15.1%
Renter-Occupied Units:	41,649
% Renter-Occupied Units with One or More Condition:	49.1%

Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

Fair Market Rents are estimates of the 40th percentile gross rents for standard quality units within an area.^{xviii} Spending more than 30% of income on rent is considered being ‘cost-burdened.’ In the table below, the 2023 FMRs for the service and percent of renters paying 30% or more of household income toward rent.

Fair Market Rents and Renters Paying 30% or More of Household Income

	Fair Market Rent 2023 One Bedroom	Fair Market Rent 2023 Two Bedroom	Renters paying 30% or more of household income
Carrol	\$655	\$862	27.4%
Clinton	\$682	\$898	42.3%
Tippecanoe	\$917	\$1,071	57.2%
White	\$654	\$861	39.7%

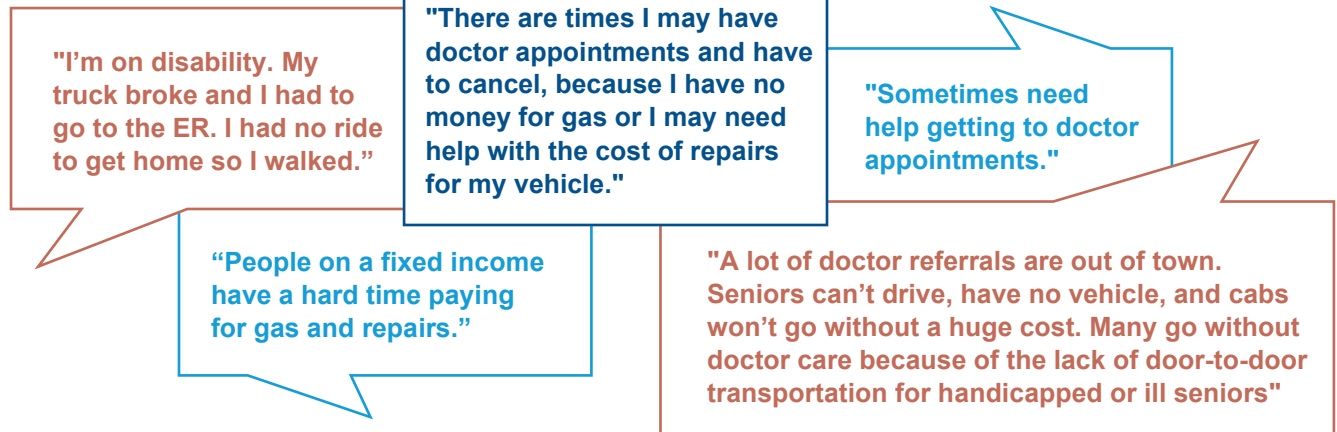

Source: U.S. Department of Housing and Urban Development 2023 FMRs, U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

Community Action Agencies can:

- Offer HUD housing counseling
- Connect individuals with Individual Development Accounts so they can save to purchase a home
- Provide weatherization and other housing quality improvement services
- Continue to invest in or collaborate to create affordable housing options
- Connect Hoosiers in need with Housing Choice Vouchers and other housing stabilization or homeownership programs

Transportation Support

In clients' own words:

Transportation is a complex issue, and the barriers to transportation vary both by individual and by location. Currently there are few resources for individuals struggling with transportation in Indiana. These disparities are even greater in rural areas where 20-25 counties do not have any form of transit.^{xxix} COVID-19 induced unemployment and financial insecurity, in turn contributing to households losing access to cars, forcing them to depend on unreliable and infrequent transit services.^{xx}

Access to a car plays a crucial role in enabling greater participation in society, accessibility to amenities, and social interactions compared to public transportation. Car-less households face tangible disadvantages, and episodes of car-lessness are common among low-income households. Losing access to a car typically results in decreased activity participation, and lower quality of life, while regaining a car plays the opposite role.^{xxi} Individuals with access to a car experience better employment and economic outcomes,^{xxii} eat a wider variety of foods,^{xxiii} shop for food more frequently, and consume more produce.^{xxiv} Limited transportation access has been associated with lack of regular medical care, uncompleted referrals or follow-up appointments, appointment cancellations, and missed appointments.^{xxv}

Household Access to Vehicles in CSBG Service Area

	No Vehicle Available	1 Vehicle Available	2 Vehicles Available	3 or More Vehicles Available
Carroll	308	1,942	2,903	2,814
Clinton	598	3,398	4,697	3,689
Tippecanoe	6,329	26,581	26,786	13,631
White	245	2,851	4,220	2,543

Source: U.S. Census Bureau, 2018-22 American Community Survey 5-Year Estimates

Survey participants were asked what they find most difficult about getting where they need to go. 48% of respondents said the cost of gas, insurance, and monthly payments while 21% percent chose paying for repairs. Additionally, some participants commented that they needed reliable public transportation. Survey participants were also asked if they missed one of the following appointments due to transportation issues. The below chart shows the results of missed medical appointments, work, job interviews, and court appointments. Medical appointments and work were the most commonly missed appointments.

Missed Appointments Due to Transportation Issues

Community Action Agencies can:

- Continue to provide transportation to clients and improve accessibility to needed services
- Provide license reinstatement support
- Conduct car maintenance workshops to teach basic car repairs (oil change, change headlights, check fluids, etc.)
- Partner with local mechanics to provide reliable client referrals, and car donation programs
- Help individuals plan for benefit cliffs as they move into higher-wage jobs or receive promotions
- Partner with local insurance companies that provide affordable rates for individuals that may have had a lapse in car insurance coverage
- Offer gas cards

Services for those with Physical and Mental Disabilities

In clients' own words:

Disability is associated with poverty. The cost of a disability varies from person to person, but the direct and indirect cost create additional barriers to achieving self-sufficiency for those individuals. Direct cost includes having to building ramps, purchasing food for special diets, or paying more for an accessible vehicle or housing. The largest extra costs are for personal assistance services and health care, where out-of-pocket costs for people with a disability are more than twice as high as those without a disability.^{xxvi} Indirect cost are arguably the most expensive and distressing cost. They include the forgone wages due to barriers to work, or employment discrimination. The loss of wages of family member enlisted to care for the disabled individual, or the decrease in caregiver wages to take a job that accommodates their ability to care for their family member.^{xxvii} Additionally, people with disabilities encounter many financial expenses that those without disabilities do not incur. It is estimated that a household containing an adult with a work disability requires, on average, 29% more income (or an additional \$18,322 a year for a household at the median income level) to obtain the same standard of living as a comparable household without a member with a disability. Single adults with disabilities are estimated to have higher costs than those with disabilities who are married, and adults with cognitive impairments are estimated to have higher costs compared to those with other kinds of impairments.^{xxvii}

The U.S. Census Bureau estimates that 28.5% of adults in Indiana have a disability. The chart below shows the type of disability Indiana residents were indicated to have in 2021.

Indiana Residents with a Functional Disability Type

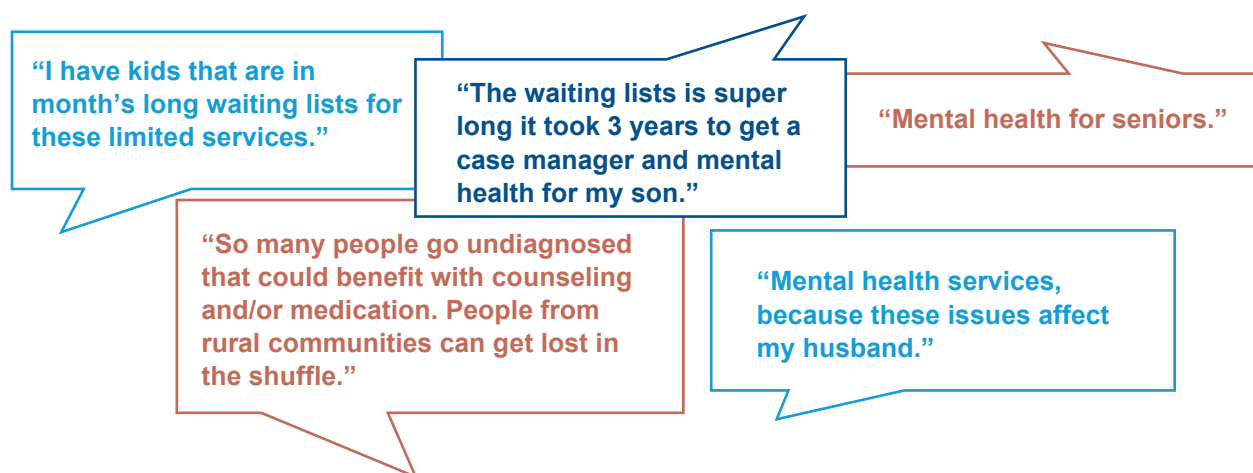

Source: Centers for Disease Control and Prevention, 2021 Disability and Health Data System

Community Action Agencies can:

- Develop a handyman service to provide minor housing repairs
- Provide a cleaning and errand service
- Create a donation program to obtain/repair accessibility equipment (e.g., wheelchairs, ramps)
- Create a volunteer program that builds ramps for disabled individuals

Mental Health and/or Counseling

In clients' own words:

Mental and physical health conditions are both a cause and condition of poverty.^{xxviii} There are vicious cycles at work that allow people to continually stay in poverty and ultimately produce intergenerational effects related to a person’s mental and physical health. Those experiencing low income or poverty are one and a half to three times more likely to experience depression or anxiety. A loss in income can produce stress and anxiety for a person and their household while mental illness can also worsen economic outcomes.^{xxix} The effects of depression and anxiety - such as a loss of attention span and distorted memory - are likely to influence a person’s economic decisions regarding their work and consumption habits.^{xxx}

Interventions to address mental and physical health and poverty must be complementary to make progress. In order to be economically productive, mental equilibrium is essential. On a positive note, interventions such as cash transfers and broader antipoverty programs have been shown to reduce depression and anxiety.^{xxxi}

Community Action Agencies can:

- Connect with, coordinate, or offer health services and education to ensure that clients can receive treatment for physical and mental health
- Embed screening and referral systems for physical and mental health in other client services
- Equip frontline staff to be responsive to physical or mental health needs

Additional Community Needs

In response to the open-ended question, participants also expressed a variety of other needs. Listed below are statements from clients on community needs 6-10:

Programs for Seniors

"Services for assisting seniors." "Mental services for seniors." "Senior education. We don't have kids around to help us with technology."

Good Jobs with Higher Wages, Benefits, and Opportunities

"Jobs paying more, because the wages out here isn't enough to live off of." "Job skills training, so I can get a good paying job that isn't killing me to work." "Finding a good job, good pay, and good hours has been really difficult." "Second chance hiring. I've barely got a record. At least 7 places have turned me down. I am struggling so hard."

Quality and Affordable Childcare

"Childcare is a barrier for many families and prevent people from being able to work." "We don't have any good childcare in our community." "Working parents deserve childcare they can afford without having to worry about using half or more of their pay alone solely for childcare."

Legal Services

"You never know when you will need advice." "It is very costly and without a good attorney you could misrepresent yourself in court."

Debt Relief

"I imagine there are a lot of people like me who do not have enough money for their daily needs and rely on credit cards to make up the difference."

Civic Engagement

Community Action has a long history of dedication to civic engagement. As has been noted by the Community Action Partnership,^{xxxii}

A primary goal of the original Community Action Program was to empower all residents of a community to create opportunity-rich environments where they could thrive – “to help people help themselves and each other.” The architects of the program recognized that effectively fighting poverty required not just coordinating services, but also the “maximum feasible participation” of groups receiving those services. They understood that poverty and political exclusion are intertwined, partially by design. Throughout our history, and even today, the persistent and violent disenfranchisement of the customers and communities we serve has exacerbated that exclusion.

The first programs also understood that restoring inclusivity required programs to instill a sense of political empowerment in their customers. Actual, meaningful access to the polls gives people experiencing low incomes the chance to help shape their own futures. In the words of Robert Kennedy, “maximum feasible participation means giving the poor a real voice in their institutions.”

For the first time, the 2024 Community Needs Assessment survey asked questions about civic participation. Of the types of civic engagement we asked about, participants were most likely to have voted in an election (51.4%) but nearly half of respondents in the CSBG service area did not engage in any of the listed civic engagement activities.

Civic Engagement Activities in the Past Two Years

Among those who reported that they did not vote in the past two years, the most commonly cited reason was “I do not feel I know enough about the candidates and issues.”

Non-Voters Reasons for Not Voting

Community Action Agencies can:

- Provide opportunities for clients and community members to meet and learn about elected officials and opportunities for civic engagement
- Ensure community members know their rights related to absentee ballots and taking time off work to vote on election days
- Increase youth access to civic engagement
- Assist with voter registration
- Offer leadership development or civic engagement programming to empower residents

Methods of Dissemination

The needs assessment serves as a guide for Area IV to secure new funding sources, recognize the impact of the services they provide, and understand how they can improve their agency. Area IV disseminates information through its website (www.areaivagency.org), Facebook and Instagram accounts, the agency’s annual report, quarterly newsletters, community outreach events, community meetings and forums, and stakeholder presentations.

Final Thoughts

Area IV is already actively working to address the top needs through its programs and referrals to its robust network of community partners. Continuing to address the top identified needs will require resources and interventions at the family, agency, and community levels.

Family
<ul style="list-style-type: none"> •Resources to better meet basic needs such as housing, transportation, child care, food, and services for individuals with disabilities •Connection to existing resources
Agency
<ul style="list-style-type: none"> •Funding to expand programming •Partnerships to meet community needs for housing transportation, child care, food, and services for individuals with disabilities •Professional development and networking opportunities to build staff capacity
Community
<ul style="list-style-type: none"> •Greater supply of affordable housing •Employers offering family-sustaining wages/benefits and education/skills pathways to good jobs •Programs and services to provide greater access for nutrition, transportation, child care, and individuals with disabilities •Coalitions to advocate for policy change related to foundational needs, jobs, and social programs

Community Action Agencies are leaders in the complex and ever-changing work of addressing the causes and conditions of poverty in Indiana. Through deep understanding of the contexts in which Hoosiers are born, grow up, work, and raise families, they innovate, adapt, and serve. When Hoosiers are financially stable, they can reach their full potential and better serve their families and communities. All Hoosiers owe a debt to these agencies as they continue to fight on the front lines of the War on Poverty.

Appendix 1: Client Survey Questions

Question 1:

What county do you live in?

Question 2:

Your age group: [18-24] [25-34] [35-49] [50-64] [65-69] [70+]

Question 3:

Your gender: [Male] [Female] [Non-Binary] [Prefer not to say]

Question 4:

Your race: [White/Caucasian] [Black/African American] [American Indian or Alaskan Native] [Asian] [Native Hawaiian or Other Pacific Islander] [Two or More Races] [Prefer not to say] [Other]

Question 5:

Do you identify as: [Hispanic, Latino, or Spanish Origin] [Not Hispanic, Latino, or Spanish Origin] [Prefer Not to Say]

Question 6:

What Community Action Agency have you used or requested services from most recently?

Question 7:

How did you learn about this Community Action Agency?

Question 8:

What services have you used? Check all that apply. [Business Loan/Assistance] [Case Management] [Covering Kids and Families] [Energy/Utility Assistance Program] [Head Start or Early Head Start] [Health & Wellness Program] [Housing Assistance Program] [Meals and Nutrition Program] [Senior Programs] [Support Groups] [Supportive Services for Veteran Families] [Transportation Services] [Weatherization] [WIC] [Youth Programs] [Other (please specify)]

Question 9:

How satisfied are you with: [Scale: Very satisfied to very dissatisfied]

The services you received

The way staff treated you

Staff knowledge

Time it took to receive services

Overall satisfaction

Question 10:

Is there a service you wish this agency had, but does not?

Question 11:

Please share anything else you would like us to know about this agency and their services.

Question 12:

What is your household status? [Single] [Married] [Partner] [Living with roommate/s]

Question 13:

Are there children who live in your household at least part of the time? [Yes] [No]

Question 14:

How many children are in your household? [1] [2-3] [4-5] [6 or more]

Question 15:

Are any of the children in your household your grandchildren? [Yes] [No]

Question 16:

What are the age ranges of the children in your household? Check all that apply. [less than 1 year old] [1-5 years old] [6-12 years old] [13-17 years old]

Question 17:

Do you use child care services? [Yes] [No] [No, but I need child care]

Question 18:

Why do you not have child care? Check all that apply. [I cannot afford it] [There are no opening where I want to enroll my child] [There is not a child care facility close by] [My child has a disability that cannot be accommodated] [Other (please specify)]

Question 19:

Are you satisfied with the child care you receive? [Scale: Very dissatisfied to very satisfied]

Question 20:

How important is it that your child care has the following: [Scale: Not at all important to very important]

- Long/Flexible hours
- Reasonable cost
- Is close to home
- Have certified teachers
- Have similar ideas about raising children

Question 21:

What are the TOP 5 needs in your community? Choose only 5. [Legal services (e.g. family law, evictions, expungement, debt collection)] [Crime awareness / crime reduction] [Debt relief] [Good jobs with higher wages & benefits and/or opportunities to advance] [Education/job skills training] [Internet & computer access and skills] [Budgeting classes and/or credit counseling/repair] [Domestic violence supports] [Food assistance] [Mental health and/or counseling services] [Youth programs] [Senior citizen programs] [Addiction treatment services] [Second-chance hiring programs for those with criminal records] [Housing assistance (e.g. rental assistance, weatherization)] [Child care that is affordable and accessible] [Transportation support (e.g. gas cards, help with repairs, transit services)] [Programs that teach English, or translate official documents] [Services for those with physical or mental disabilities]

Question 22:

Which is your TOP choice and why?

Question 23:

Is there something that was NOT on the list that you and your community need?

Question 24:

How connected do you feel you are with your local community? [Scale: Very Connected to very disconnected]

Question 25:

What would make you feel more connected to your community?

Question 26:

Do you feel safe in your community? [Yes] [No]

Question 27:

What is the MONTHLY income of all household members combined? [\$0-500] [\$500-1,000] [\$1,000-2,000] [\$2,000-3,000] [\$3,000 or more]

Question 28:

What are the sources of income for your household? Check all that apply. [Wages/Salary] [Small Business] [Social Security / SSI] [Pension] [TANF] [Unemployment] [Other (please specify)]

Question 29:

As a child, did your family receive government assistance or any other type of public assistance? [Yes] [No] [Don't know]

Question 30:

Have you or someone in your household experienced a life-changing event that suddenly changed your financial status? Check all that apply. [An accident that led to you or a household member being disabled] [Severe illness] [Caring for a loved one who is sick or disabled] [Lost job/lay off] [A significant expense that made it difficult to meet your basic needs] [Loss of child care] [Death of a family member who contributed to your income] [Extreme medical debt from a serious illness] [A tragic event (housefire, death of a child, mental illness, ect.)] [No] [Other (please specify)]

Question 31:

In the past year, have you received support from any of the following? Check all that apply. [Temporary Assistance for Needy Families (TANF)] [SNAP (formerly Food Stamps)] [Women, Infants, and Children Nutrition Program (WIC)] [Housing Choice Voucher (Section 8)] [Emergency Rental Assistance] [Medicaid / HIP] [Child Care Vouchers / CCDF / On-My-Way PreK] [Food Banks] [Free Health Clinics] [Township Trustees] [Other (please specify)] [None of the above]

Question 32:
